REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

As per claim 1, the prior arts of record, taken alone or in combination, fail to disclose or render obvious the steps of emitting pulsed radiation of a second wavelength, which is shorter than the first wavelength along a second radiation axis into the measuring volume; measuring radiation scattered on particles located in the measuring volume under a forward scattering angle of more than 90 degrees and under a backward scattering angle of less than 90 degrees, wherein forward scattered radiations and backward scattered radiations of the first and second wavelengths are measured separately from each other, wherein the scattered radiations of the first and second wavelengths are measured on opposite sides of the measuring volume on a same main axis, which is structurally arranged and functionally operated as claimed.

As per claim 20, the prior arts of record, taken alone or in combination, fail to disclose or render obvious the steps of emitting pulsed radiation of a second wavelength, which is shorter than the first wavelength along a second radiation axis into the measuring volume; measuring radiation scattered on particles located in the measuring volume under a forward scattering angle of more than 90 degrees and under a backward scattering angle of less than 90 degrees, wherein forward scattered radiations and backward scattered radiations of the first and second wavelengths are measured separately from each other, wherein the scattered radiations of the first and second wavelengths are emitted into the measuring volume from opposite sides along
